Questions for Public Works

Question 1

I ordered no skid tape with a glow in the dark stripe so it should be able to be seen in the dark as well.

Question 2

The loose board on the bridge was repaired. We have a plan to repair the washout under the bridge as well and will be taking care of that soon.

Question 3

We will work on getting a gate set up for both parking lots that are on 165th.

Question 4

To replace all the 6x6 posts in Park we need roughly 276 posts. It would be our plan to replace them all at the same time because they are all roughly the same age and we need to schedule about 2 weeks of time to get it done. We need to remove all the old post then rent a post auger and install new post. We would be buying 138 6x6x14 AC2 green treated beams and cutting them in half. The price for those beams on 05/25/2023 is $68.17 plus tax for a total of $9,407.46. There is also an option to use a cedar tone beam and that cost would be $10,365.18 plus tax.

Park lighting

The City Park currently has 4 light that it is paying for, I made a map showing the pole numbers and locations. The question was asked about moving a light, here is the information that I received from Connexus.

- To move a light from one pole to another is $155.00.
- To add another light to an existing pole is #357.00.
- If the added light is on a 55-mph road, we would need to add a breakaway mount and the cost for that is $534.00.
- If we want a light where there is not a pole and they needed to add one the cost would be $620.00 for a 30' pole and $741.00 for a 35' pole. If we were to choose this rout there would be a wire cost plus trenching or boring cost.
- I made a map that shows possible locations to move or add new lights to the existing poles in the park area. If you chose a different location, we could add a new pole.
- Last, is the Park Board looking to change the hours of use for the park?
